

# Let's get down and dirty with the Giant Gippsland Earthworm.....

**When:** Monday 9th September 2013

**Where:** Wilma & Peter Mackay's property at  
180 Schmidts Road, Poowong East

**Time:** 10.30am for 11am start

**Speaker:** Dr Beverley Van Praagh (Invert—Eco Consultancy  
and GGE Recovery Team)

Since completing her PhD on the Giant Gippsland Earthworms (GGE) in the 1994, Beverley has been involved in research on GGE for nearly twenty years. She has a wealth of knowledge and experience in the habits and biology of these bizarre and unique creatures. Beverley will be providing technical expertise into the “Building capability to manage GGE habitat of farms” project which is being funded through the Caring for Our Country Program—Community Landcare Grant.

## Do you have worms?

This workshop will help you identify where you might find GGE on your property.

So come and learn more about them and find out how you can be part of this exciting new project.

We are looking for demonstration sites to revegetate and manage as worm habitat.
